

## FLOOR PLANS

### LEVEL 00

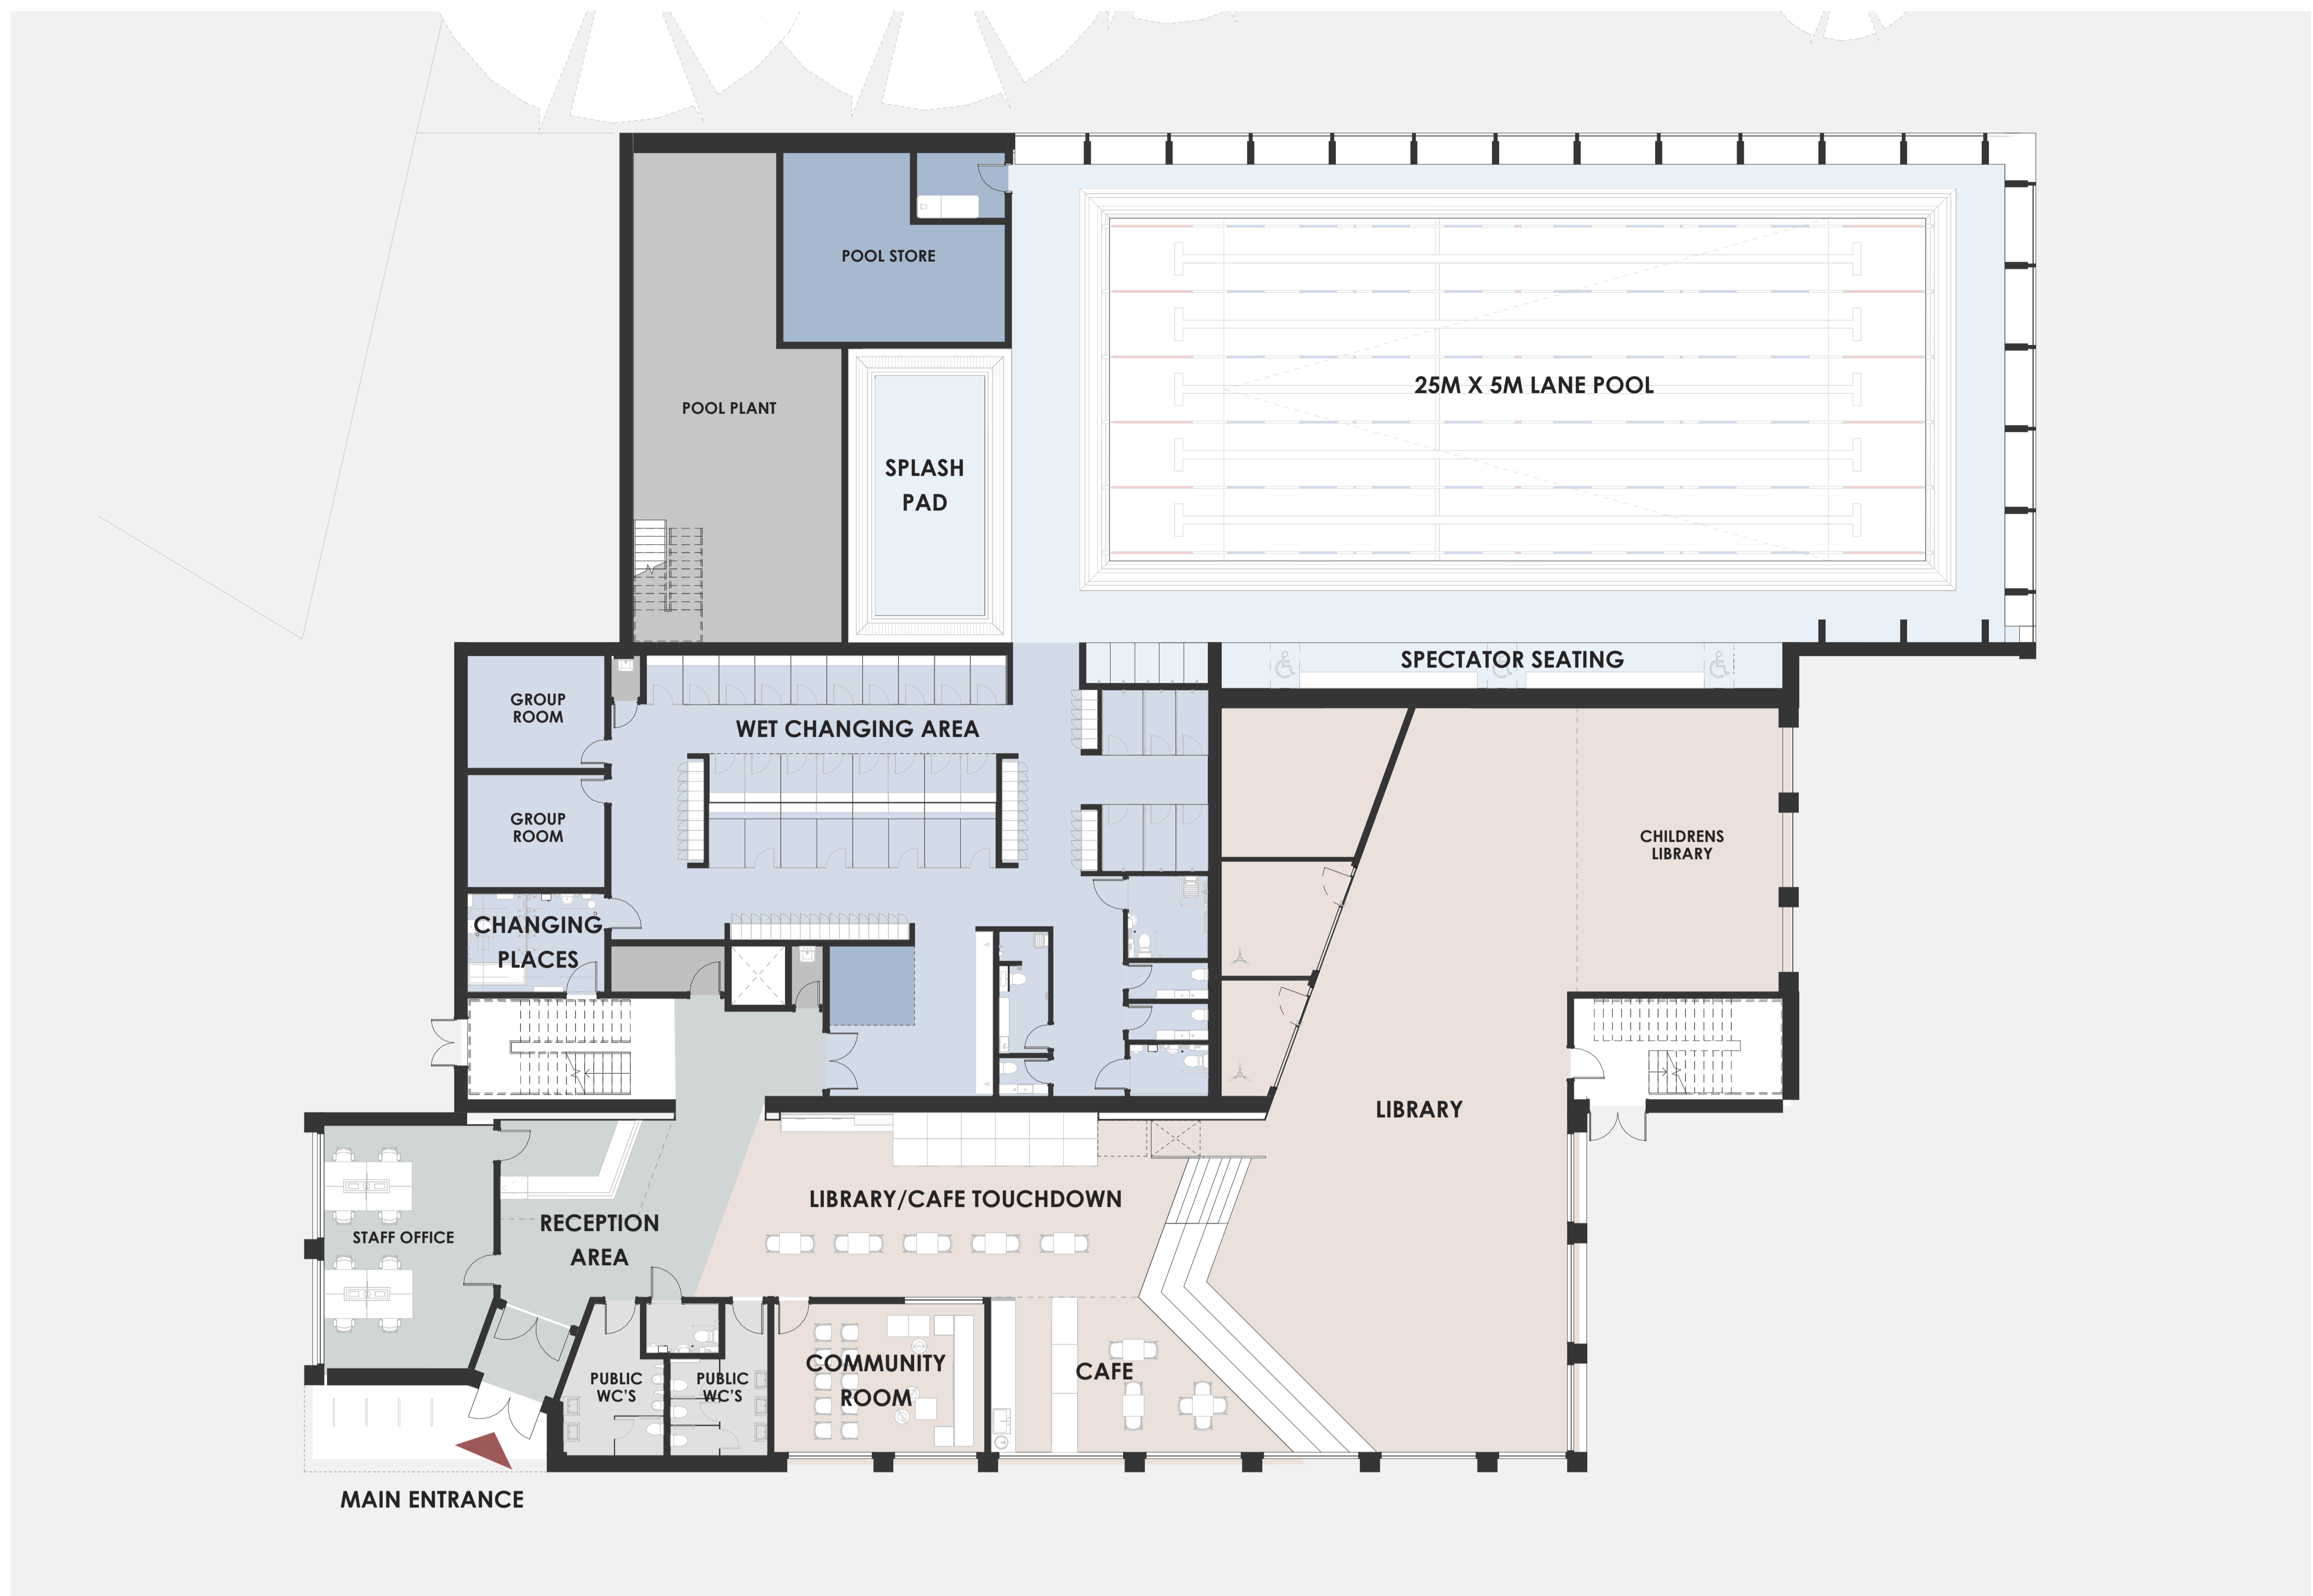

The main entrance of the building is situated in the South West corner, serving as a gateway to the public realm and the civic entrance into the Community Hub.

Clear way-finding and a coherent sequence of areas for public and private users were essential focuses during design.

Staff areas, including reception and office spaces, overlook the entrance lobby and library, creating an inviting environment.

The wet-side changing village provides access to the Splash pad, a 5-lane 25m pool, and spectator seating. The library's location allows for potential outdoor seating and

fosters greater community interaction with the park while a café to the East enhances the route and provides views of Hollins House.

### LEVEL 01

The first floor is dedicated to fitness and community activities, planned to add vitality to the façades. Double height volumes facilitate cross views between the fitness suite

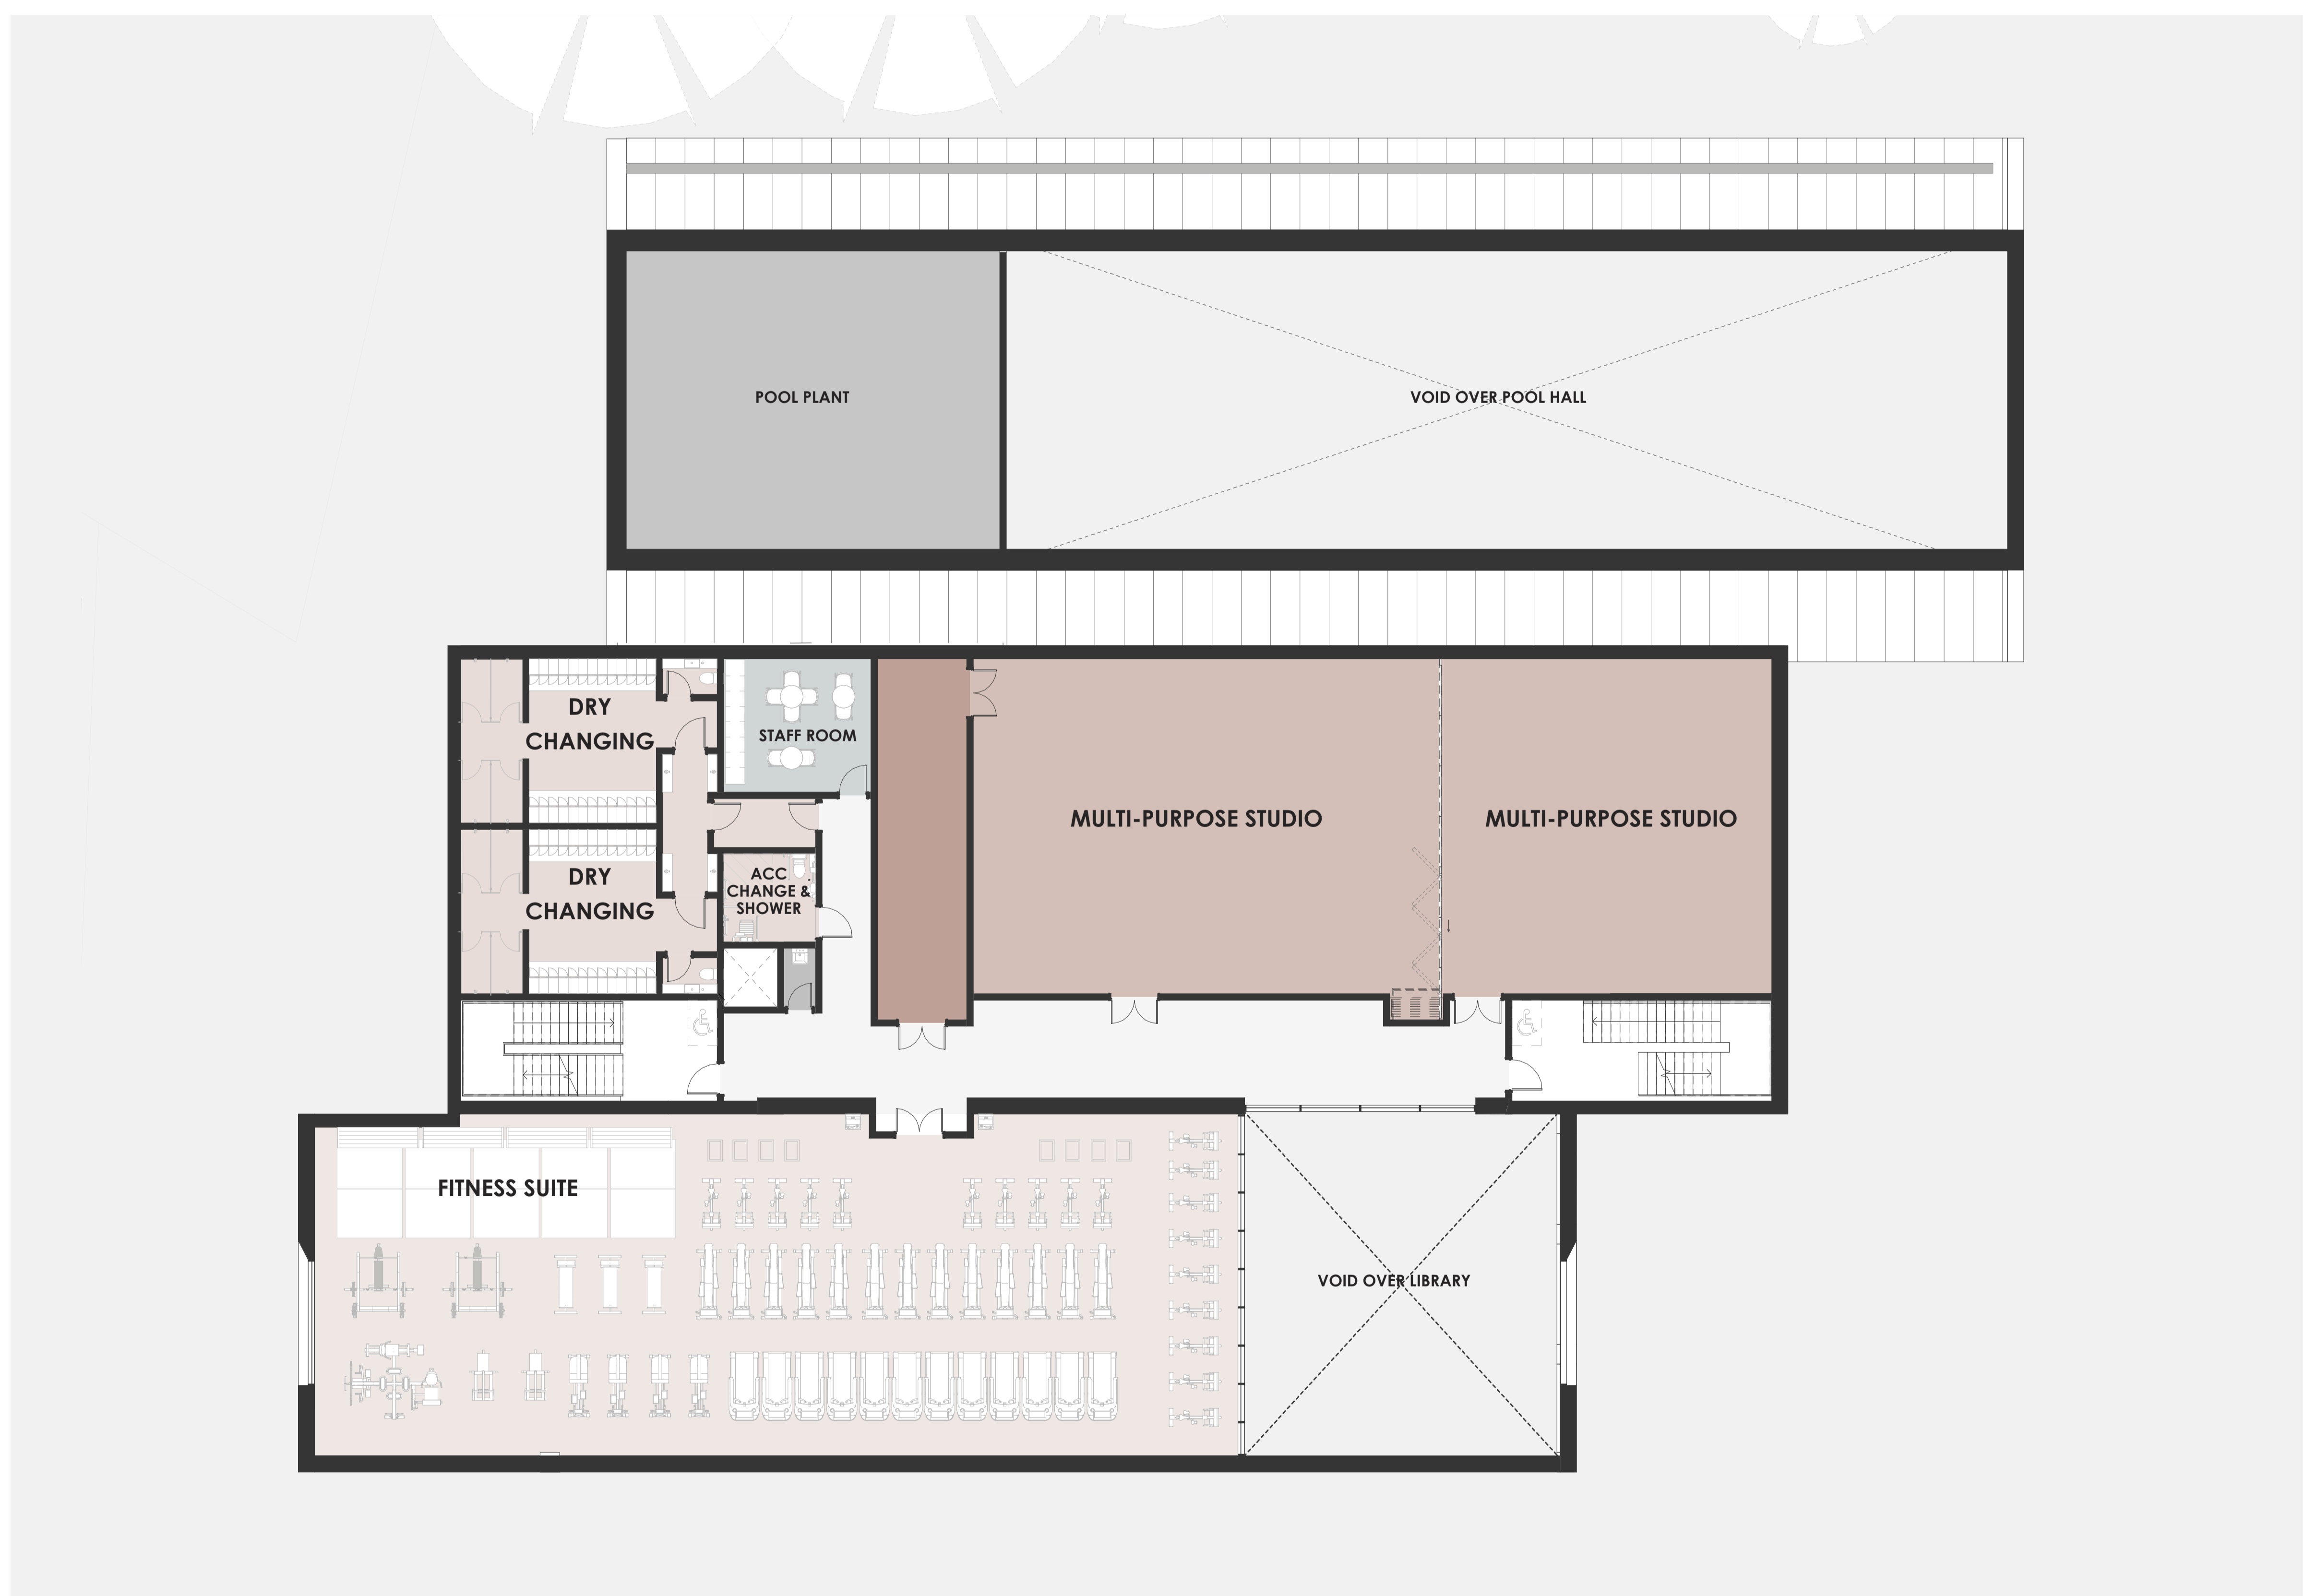

and the library area, offering elevated views of the library space and glimpses of the external façade.

Multi-purpose studios enhance the space's functionality, accommodating a series of uses. This adaptability encourages active and social interactions among

visitors, strengthening community engagement.

The integration of fitness and community spaces promotes a healthy lifestyle and a sense of

interconnectedness within the Community Hub.

### LEVEL 02

The Second floor is carefully planned to primarily accommodate the relocated NHS Marple clinic, ensuring it meets the healthcare facility's specific needs.

Additionally, the floor provides office space for administrative tasks and coordination. This strategic co-location enhances accessibility and efficiency, allowing patients to easily

access medical services within a welcoming environment that also offers diverse community amenities.

The office space supports effective communication and coordination between different services and departments, making the Community Hub a comprehensive resource

for both healthcare and community engagement, fostering a holistic and inclusive environment for the local community.
